TECHNICAL SKILLS

- Back-end Development
 1. Python
 2. Flask
 3. SQL
 4. Git
 5. Postgresql
- Front-end Development
 1. HTML
 2. CSS
 3. JavaScript
 4. ReactJs
- Computer Aided Design
 1. Solidworks

SOFT SKILLS

- Attention to detail.
- Enthusiastic learner.
- Highly adaptable.
- Leadership qualities.
- Strong collaboration skills.
- Effective time management.

ACTIVITIES

Siemens Mechatronic Systems Certification Program 2021
Electrical Components, Mechanical Components and Electric Drives, (Electro) Pneumatic and Hydraulic Circuits, Digital Fundamentals and PLCs.

DELFL French Certification level B1 Alliance Française - Nairobi 2018

PROFILE

Full-Stack Software Engineer proficient in Python with Flask, React, and JavaScript-based programming, with a solid background in Mechatronic engineering. Experienced in problem-solving and proficient at executing tasks with precision. Whether it's optimizing backend processes for efficiency or creating intuitive user interfaces, I'm dedicated to leveraging my skills to drive positive change and make a meaningful impact.

TECHNICAL PROJECTS

Bazuu Fitness [Github](#)

Full-stack web application designed to revolutionize fitness journeys by fostering community-driven support and engagement.

- Employed Flask, SQLAlchemy, and OOP for dynamic features including authentication, activity management, and community interaction, secured with bcrypt. Postgresql for the database.
- Utilized React.js for intuitive navigation, personalized profiles, and seamless interaction with Zustand for state management and Formik/Yup for form management and validation.

Travel Itinerary Organizer - [Github](#)

CLI application that efficiently organizes travel plans with detailed destinations, activities, and accommodations.

- Employed SQLAlchemy ORM and CLI to create a Python-based software for efficient itinerary planning.
- Implemented Object-Oriented Programming (OOP) principles to develop CRUD operations for trips, destinations, accommodations, and activities.
- Enhanced user experience with intuitive navigation and robust error handling.

EDUCATION

Moringa school **Full-stack Software Engineering** 2023 - 2024

Relevant Modules:

HTML, CSS, JavaScript, React, Python, Flask, SQL, Git

Dedan Kimathi University of Technology 2018 - 2023

Bachelor of Science in Mechatronic Engineering
Grade: Second class honors upper division

EXPERIENCE

Bhachu Industries Limited Nairobi, Kenya
Mechanical Design Engineer 01/2023 - Present

- Produced over 50 detailed engineering drawings and documentation using Solidworks for trailers and gas cylinders.
- Designed trailers and gas cylinders that passed rigorous quality checks and adhered to industry standards, contributing to the company's reputation for quality and reliability.
- Collaborated with managers and experts to ensure project requirements were met, resulting in efficient design solutions.
