- Enthusiastic learner.
- Highly adaptable.
- Leadership qualities.
- Strong collaboration skills.
- Effective time management.

ACTIVITIES

DEL F French Certification level B1

Alliance Française - Nairobi

2018

PROFILE

As a Full-Stack Software Engineer, I'm passionate about building end-to-end web applications that provide seamless user experiences and robust back-end functionality. I focus on creating clean, maintainable code and delivering high-quality solutions that scale with the needs of the business. Whether designing intuitive front-end interfaces or developing powerful back-end systems, I approach every project with a problem-solving mindset.

I work with a variety of tools and technologies, including ReactJS for the front end, and Python, Flask, and PostgreSQL on the back end. I also utilize JavaScript, HTML, CSS, and SQL, while managing version control with Git to ensure smooth collaboration.

EXPERIENCE

Website Developer – Freelancer

06/2024 - Present

- Designing and developing responsive, user-friendly websites for small businesses across various sectors, including retail, consulting, and education.
- Utilizing HTML5, CSS3, JavaScript, and React to create clean, modern interfaces with a focus on user experience and performance.
- Integrating back-end functionality using Flask and PostgreSQL for data-driven web applications.
- Customizing sites based on client needs, ensuring cross-browser compatibility and mobile-first responsiveness.
- Working directly with clients to gather requirements, present wireframes, and deliver tailored solutions within tight deadlines.
- Implementing SEO best practices and basic analytics to improve website visibility and monitor performance.
- Managing source control using Git and deploying projects to hosting platforms
